

*The rotomoulded tank system*

**ACO Grease, starch and light liquid separators  
for below ground installation**

**ACO**

## ACO Grease, starch and light liquid separators for below ground installation

Commercial operations generating wastewater must implement appropriate measures, by using suitable pre-treatment installations like separators, to ensure that solids and liquids which can give off toxic and unpleasant vapours and odours are prevented from damaging construction materials and drainage facilities, harming operations, and are held back so that they do not enter sewage pipes.

**Quality standards and tests**  
All ACO Grease separators are manufactured in accordance with EN 1825, all ACO Light liquid separators are manufactured in accordance with EN 858. All the separators in the range are hydraulically tested and have General Building Supervisory Authority Authorisation and/or the new application authorisation from DIBT Berlin.

### The rotomoulded tank system

**Structural stability**

**Protection against upwelling**

#### Product stability guaranteed for 50 years

- Certified statics have been calculated for the tank system
- The tank system supplies structural stability for 50 years

#### Protection against maximum ground water level

- Depending on the maximum allowed inlet invert, the separators can be installed in areas with maximum ground water until the ground level surface
- It is not necessary to cast an extensive upwelling protection on site

**Available for load class A, B or D**

#### Flexible application

- Load class A: walkable – courtyards, open space
- Load class B: drivable for cars – driveways, parking areas
- Load class D: drivable for lorries – petrol stations, service entrances

**Selecting the correct separator****When do grease separators have to be used?**

Operations generating greasy wastewater have a mandatory obligation to install EN 1825 type grease separators to ensure that grease and organic oil is effectively removed from the wastewater. This applies for instance to kitchens and meat-processing operations. It is mandatory for every grease separator installed below the backflow level (usually corresponding to street level) to have a downstream twin lifting plant or complete pumping station. Each industry and commercial operation places individual demands on the capacity of grease separators, lifting plant and complete piping stations. Customisation therefore requires adaptable products in a wide range of sizes and materials. ACO has many decades of experience in supplying the most diverse range of grease separators, lifting plants and complete pumping stations for ground installation and free-standing installation.

**When do light liquid separators have to be used?**

The use of light liquid separators is stipulated by the regulations in DIN 1986-100, Section 6.2.3: "If petroleum or light oils, especially those that are combustible or can form explosive atmospheres, enter the sewers, separator systems for light oils must be used downstream of the discharge points." Discharging petroleum and light oils into public sewers can cause groundwater and drinking water contamination, and in serious cases, cause extensive environmental damage to flora and fauna. The solution to this problem is a light oil separator. Any light oil in the wastewater is collected in a separator tank and prevented from being discharged from the separator. The discharge outlet closes automatically when the maximum storage capacity has been reached. The light oil which collects in the separator is disposed of by certified recycling companies at regular intervals.

## ACO Grease separator series Lipumax P from polyethylene

**LOW cleaning and disposal comfort**

### Lipumax P-B

#### disposal and cleaning via cover

Since disposal has to be done via the open manhole cover, it is recommended to install the grease separators in areas where the occurrence of stench does not pose inconveniences to the surroundings.

**MEDIUM cleaning and disposal comfort**

### Lipumax P-D

#### disposal with direct suction, cleaning via cover

It is possible to install a suction line DN 65 and an appropriate coupling on site.

Lipumax P-D grease separator with direct suction extraction is ideal for installation in areas where disposal via the manhole cover is not possible, in pedestrian zones or outdoor catering areas for instance.

**HIGH cleaning and disposal comfort**

### Lipumax P-DM

#### disposal with direct suction and cleaning with integrated spray head (manual control)

It is possible to install a suction line DN 65 and an appropriate coupling on site. The integrated high-pressure cleaning unit has to be operated manually and connected to a cold water supply.

Disposal and cleaning of the separator is accomplished via the direct suction and the high-pressure cleaning. Therefore, for disposal the cover has not to be removed. After the disposal and the cleaning, the separator is re-filled manually via the filling device.

5  
III

**PREMIUM cleaning and disposal comfort**

### Lipumax P-DA

#### disposal with direct suction and cleaning with integrated spray head (automatic control)

It is possible to install a suction line DN 65 and an appropriate coupling on site. The integrated high-pressure cleaning unit has to be connected to a cold water supply and is automatically operated.

Disposal and cleaning of the separator is accomplished automatically by using a remote control via the direct suction and the high-pressure cleaning. Therefore, for disposal the cover has not to be removed. After the disposal and the cleaning, the separator is re-filled automatically via the filling device which has to be connected to a cold water supply.

**ACO Starch separator series Fapumax P from polyethylene****LOW cleaning and disposal comfort****Fapumax P-B  
disposal and cleaning via cover**

Since disposal has to be done via the open manhole cover, it is recommended to install the starch separators in areas where the occurrence of stench does not pose inconveniences to the surroundings. The spray shower head serves to rinse off the starch.

**PREMIUM cleaning and disposal comfort****Fapumax P-DA  
disposal with direct suction and cleaning  
with integrated spray head (automatic control)**

It is possible to install a suction line DN 65 and an appropriate coupling on site. The integrated high-pressure cleaning unit has to be connected to a cold water supply and is automatically operated. The spray shower head serves to rinse off the starch. Disposal and cleaning of the separator is accomplished automatically by using a remote control via the direct suction and the high-pressure cleaning. Therefore, for disposal the cover has not to be removed. After the disposal and cleaning, the separator is re-filled automatically via the filling device which has to be connected to a cold water supply.

## ACO Light liquid separator series Oleopator P and Oleopass P from polyethylene

### Oleopator P – Class I

Oleopator P Class I light liquids separators are designed for ground installation outside of buildings, to treat waste water from industrial processes or oil contaminated rainwater from impervious areas or to retain any spillage of light liquid and to protect surrounding areas.

Depending on the load class and nominal size, the inlet invert varies between 450–2000 mm.

Light liquid separators can be equipped with top sections for the load classes A 15, B 125 or D 400 according EN 124.

### Oleopass P – Class I with bypass

Oleopass P Class I light liquid separators with bypass are designed for ground installation outside of buildings, to treat oil contaminated rainwater from impervious areas or to retain any spillage of light liquid and to protect surrounding areas.

It is not possible to use the separators with bypass to treat waste water from industrial processes, vehicle washing, cleansing of oil covered parts or other sources, e.g. petrol stations. Depending on the load class and nominal size, the inlet invert varies between 450–2000 mm.

Light liquid separators can be equipped with top sections for the load classes A 15, B 125 or D 400 according EN 124.

## ACO Sludge trap series from polyethylene

### Sludge Trap P

Sedimentation tanks are designed for ground installation outside of buildings, to treat polluted wastewater with huge contents of solids before the light liquid separator.

Depending on the load class and total volume, the inlet invert varies between 415–2000 mm.

## ACO Grease separator Lipumax P-B – Basic model

### Grease separator of polyethylene for below ground installation

- according to EN 1825  
and DIN 4040-100
- certificate  
7310374-01a (NS 2, NS 4)  
7310372-01 (NS 5.5)  
7310372-02 (NS 7)  
7311241-01 (NS 8.5, NS 10)
- inlet and outlet connection according  
to outside diameter D depending on  
nominal size of separator
- disposal and cleaning via cover

Installation example shows ACO Lipumax P-B NS 4  
with a top section unit for load class B 125

## ACO Starch separator Fapumax P-B – Basic Model

### Starch separator of polyethylene for below ground installation

- inlet and outlet connection according to outside diameter D depending on nominal size of separator
- spray power head to rinse off the starch
- circular pump for operation of the spray shower
- control unit for operation of circular pump via potato peeling machine
- disposal and cleaning via cover

Installation example shows ACO Fapumax P-B NS 1 with a top section for load class B 125

## Fapumax P-B – Order data

## Accessories for

## for ACO Grease separators Lipumax P and ACO Starch separators Fapumax P

	Product description	Model	Article No.
	<b>Concrete supporting rings</b> for increasing inlet invert with Lipumax P grease separators/ Fapumax P starch separators, load class B or D between cover plate and extension	ARV 625 x 60 ARV 625 x 80 ARV 625 x 100	<b>8700.20.00</b> <b>8700.20.10</b> <b>8700.20.20</b>
	<b>Sampling shaft</b> from polyethylene, diameter 450 mm, for below ground installations, down- stream grease separators/starch separators, with cast iron/concrete cover for load class B 125, odour proof	DN 100, with 160 mm gradient DN 100, with 30 mm gradient DN 150, with 160 mm gradient DN 150, with 75 mm gradient	<b>3300.13.10</b> <b>3300.13.11</b> <b>3300.13.20</b> <b>3300.13.21</b>
	<b>Sampling shaft with load distribution plate</b> from polyethylene, diameter 450 mm, for below ground installations, down- stream grease separators/starch separators, with cast iron/concrete cover for load class D 400, odour proof	DN 100, with 160 mm gradient DN 100, with 30 mm gradient DN 150, with 160 mm gradient DN 150, with 75 mm gradient	<b>3300.13.15</b> <b>3300.13.16</b> <b>3300.13.25</b> <b>3300.13.26</b>
	<b>Extension element</b> from polyethylene, for install aforementioned sampling shaft at a deeper position, extension height 100 to 650 mm, can be shortened at 45 mm intervals by cutting at the cutting marks		<b>3300.13.00</b>
	<b>Disposal shaft</b> made from plastic, material polyethyl- ene, with BEGU-Cover, clear opening: 450 mm, load class: B 125, inscription "Abscheiderentleerung/ Separator Discharge", weight: 120 kg		<b>3300.30.00</b>
	<b>Disposal shaft with load distribution plate</b> protection against upwelling, made from plastic, material polyethylene, with BEGU-Cover, clear opening: 450 mm, load class: D 400, inscription "Abscheiderentleerung/ Separator Discharge", weight: 520 kg		<b>3300.30.01</b>
	<b>Extension</b> Used with disposal shaft Made from plastic, material polyethylene for fitting on upstream sampling shaft, for deep installations, structure height: 100 – 650 mm (can be reduced to 45 mm by cutting off at cutting marks), weight: 12 kg		<b>3301.31.00</b>

	Product description	Model	Article No.
	<p><b>Grease level sensor</b>  measuring device for grease layer thickness for grease separators for below ground installation.  Suitable for liquid and hardening fats. Device with two dry contacts for report of filling status 50% and 80% to Building Monitoring System. With heated sensor head for save operation  electrical connection:  230 V AC/50 Hz/12 W</p>	cable length: 10 m cable length: 20 m cable length: 30 m	<b>3300.11.70</b> <b>3300.11.71</b> <b>3300.11.72</b>
	<p><b>Sampling equipment</b>  for grease separators/light liquid separators/starch separators for below ground installation. Sampling equipment consisting of manual pump and suction coupling, connecting hose and suction coupling and bolt connection  Suitable for inlet invert maximum T = 3,000 mm</p>		<b>8800.00.10</b>
	<b>Sealing ring</b> for ventilation connection		<b>0150.34.32</b>
	<p><b>High-pressure hose</b>  for connection between high-pressure pump (installed inside a building) and spray head of grease separator/starch separator</p>	length: 10 m length: 20 m length: 30 m	<b>0150.33.62</b> <b>0150.33.63</b> <b>0150.33.64</b>
	<p><b>Connection box</b>  from stainless steel,  material grade 316,  for wall-mounted installation of disposal connection DN 65,  W x H x D = 370 x 330 x 250 mm    Suitable for grease separators Lipumax P-DA and starch separators Fapumax P-DA</p>		<b>7601.80.20</b>
	<p><b>Flush-mounted frame</b>  from stainless steel, material grade 304,  W x H x D = 421 x 381 x 25 mm    Suitable for connection box 7601.80.20</p>		<b>7601.80.21</b>
	<p><b>Street cap</b>  frame and cover from cast iron for installation of disposal connection of grease separators Lipumax P-D/-DM/-DA and starch separators Fapumax P-DA</p>		<b>5354.00.00</b>

## ACO Light liquid separator Oleopator P – Class I

### Light liquid separator of polyethylene for below ground installation

- according to EN 858
- certificate
  - 7310434-01 (NS 3)
  - 7310434-02 (NS 6)
  - 7310434-03 (NS 8)
  - 7310434-03 (NS 10)
- inlet and outlet connection according to outside diameter D depending on nominal size of separator
- inlet and outlet parts of polyethylene
- with integrated removable coalescing filter
- automatic closure device with float switch, density of float switch:  $0.9 \text{ g/cm}^3$

Installation example shows ACO Oleopator P NS 3 with a top section unit for load class B 125

## Oleopator P – Order data

## ACO Sludge Trap P

**Sludge trap  
of polyethylene  
for below ground installation**

- inlet and outlet connection according to outside diameter D depending on nominal size of separator
- inlet and outlet parts of polyethylene
- different volumes/capacities available

Installation example shows ACO Sludge Trap P 750 with a top section unit for load class B 125

## Planning and dimensioning separators – profit from ACO expertise

### Dimensioning grease separators via the internet

Calculate nominal sizes of grease separators you require for your application on [www.aco-haustechnik.de/catalogue](http://www.aco-haustechnik.de/catalogue). Dimensioning is carried out pursuant to DIN EN 1825-2 regulations. Three dimensioning variants are possible:

- kitchen appliances
- food portions
- slaughter units

After selecting the calculation method, input the requested data into the masks for further processing in compliance with the latest DIN EN 1825 regulations. The calculation sheet can then be printed out and filled in with project data, or there is a direct link to the selection assistant for product selection.

Dimensioning grease separators

### Online catalogue

Easy download of scale drawings and article descriptions with the Online catalogue on our website. Product selection made easy with the relevant selection criteria.

- selection assistant
- easy keyword and article searches
- article descriptions (TXT, Datanorm and GAEB)
- scale drawings (DXF)
- product visuals Installation and assembly instructions
